Temporary Barriers, Partitions & Crowd Control Solutions

Pandemic Response Applications

IN STOCK FOR IMMEDIATE PRODUCTION

MODULAR PARTITION

The COVID-19 crisis demands a fast response. The social isolation requirements of the pandemic has taught us that things we once took for granted, like standing in a line, are now no longer safe. Covermaster Modular Partition System can help us quickly adapt our architecture to the new normal, and then restore it quickly when the crisis has passed

- Self-standing aluminum frame
- Any size - length or height
- Washable fabric or plexiglass® front

APPLICATION

The Modular Partition System has many uses that can help our response to the COVID-19 Pandemic.

INSTA-ROOM

Health Care Applications

- Convert open spaces to pop-up hospital or isolation rooms
- Isolation booths for clinic or hospital reception

Port of Entry / Government Office Applications

- Isolation booths for form-filling, kiosk use or video interviews

Business / Office Applications

- Convert open plan offices to increase social distancing

Retail

- Create 3-sided booths to isolate self check-out machines

SAFE QUEUE

Health Care Applications

- Control social distancing in ER triage queues

Port of Entry / Government Office Applications

- Control social distancing in entry queues

Business / Office Applications

- Control social distancing at clock-in/clock out zones
- Use anywhere where employees or customers queue

Retail

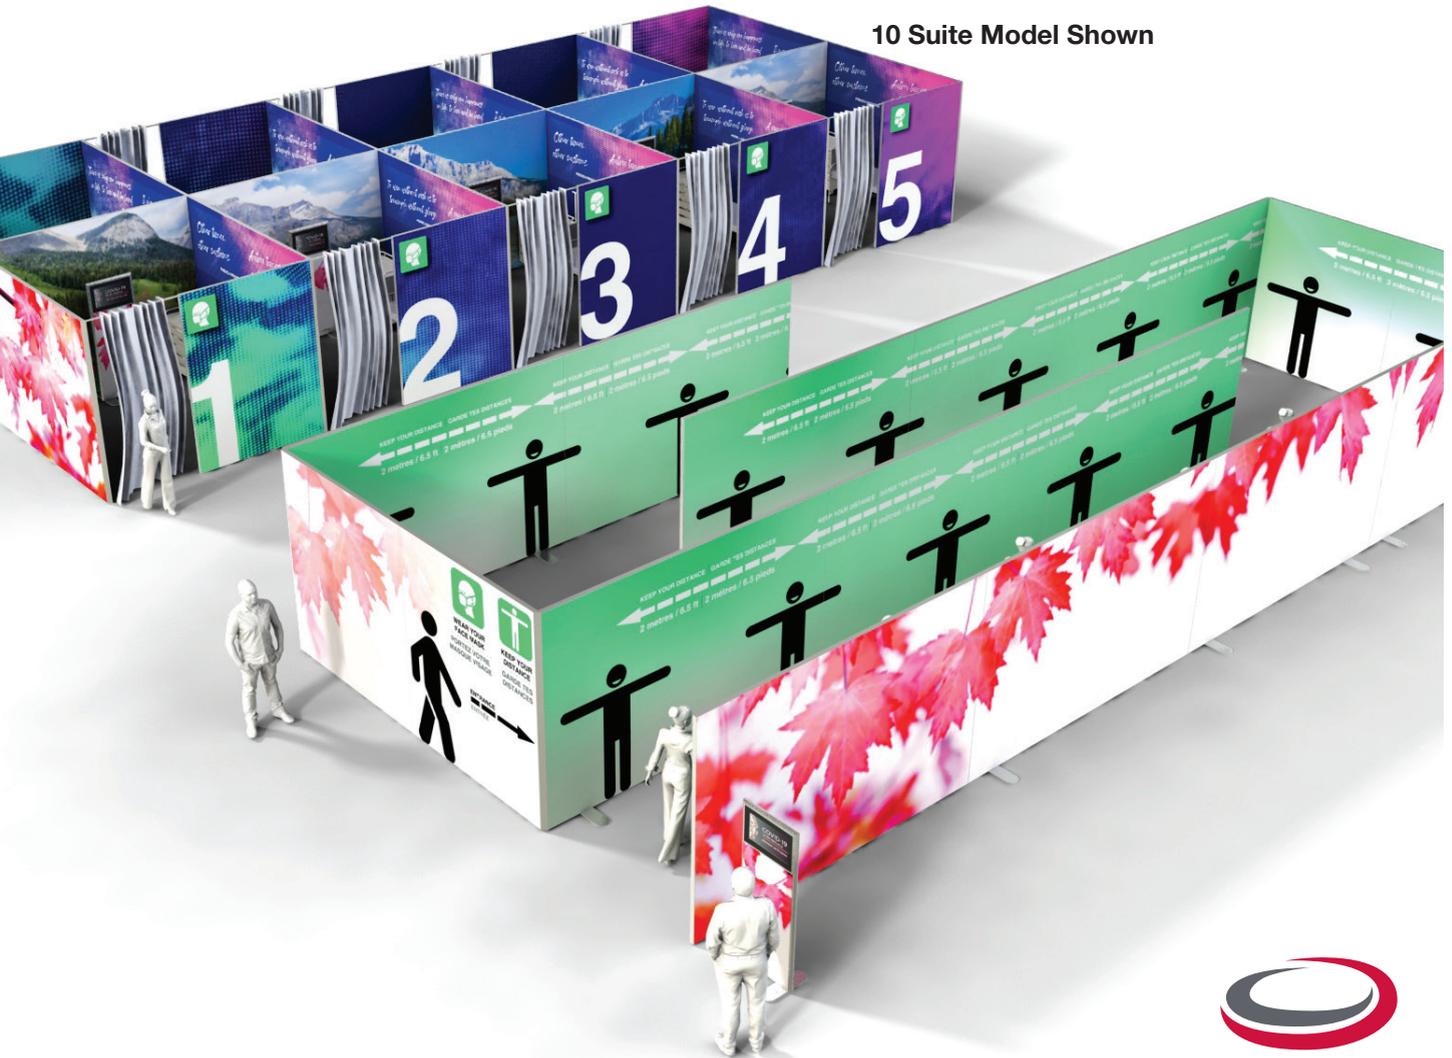

- Isolate check-out lines
- Crowd-control barriers

INSTA-ROOM & SAFE QUEUE

10 Suite Model Shown

Contact us at 1-800-387-5808 or info@covermaster.com

INSTA-ROOM

Turn an atrium or other open area into a suite of patient rooms in a single day.

Anodized or powder-coated frames are available. Frame sizes are set at manufacture, but the layout can be configured as required. Rooms can be added or removed as needed. Available graphics provide important information or calming images.

FEATURES:

- Configurable for different layouts and room sizes, from the size of a phone booth up
- An entire suite of 10 rooms can ship on one 4'x10' (1.2mx3m) pallet
- Can be erected in one day or less with simple training – no skilled labor required

The **LOOK** Company®

The cutaway shows the available bonded fibreglass acoustic panel

AVAILABLE WITH:

- Customizable graphics – SEG Graphics can be changed in minutes
- Sound deadening bonded fibreglass acoustic panel
- Anti-microbial treatment on fabric & aluminum

Contact us at 1-800-387-5808 or info@covermaster.com

SAFE QUEUE

Promote self-isolation behaviour with graphic partition system.

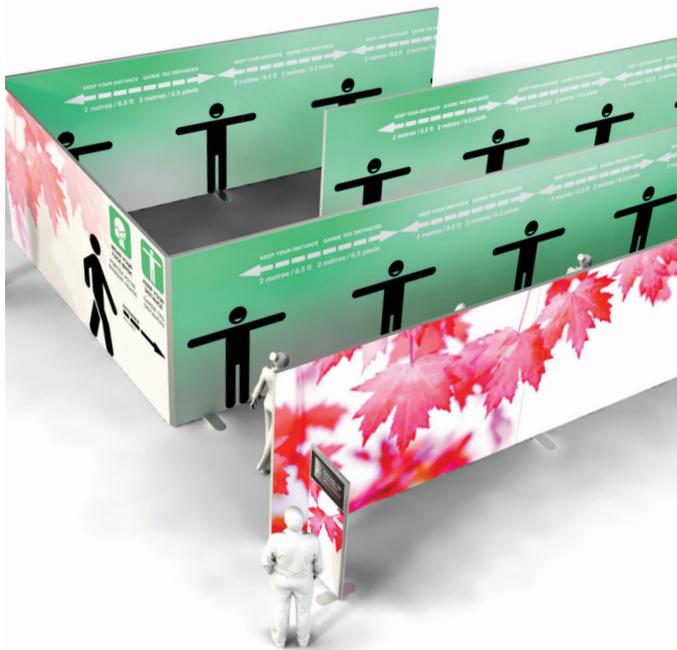

Even in the midst of the COVID-19 outbreak, public spaces like airports, retail stores and government offices are filled with people breaking social isolation standards as they crowd through the available space.

The Safe Queue system is built using Covermaster's Modular Partition to isolate different lanes of a zigzag queue with an 8' (2.4m) high barrier. Additionally, graphics display and promote the required separation.

The **LOOK** Company®

Available with
Plexiglass® panel

FEATURES:

- Lightweight
- Freestanding
- Moveable

Contact us at 1-800-387-5808 or info@covermaster.com

COMMUNICATION STAND

Covermaster's Stand provides a way to provide information or interact with people without exposing staff to possible infection.

FEATURES:

- Only available in Android® tablet
- Configurable sizing and changeable custom graphics
- Available anti-microbial coatings

Custom printed fabric front and back

Digital Screen

MODULAR PARTITIONS

MODULAR CONNECTORS

The connectors are the components that attach your walls & partitions together to assemble your desired shape.

We provide almost unlimited design flexibility through our broad suite of solutions.

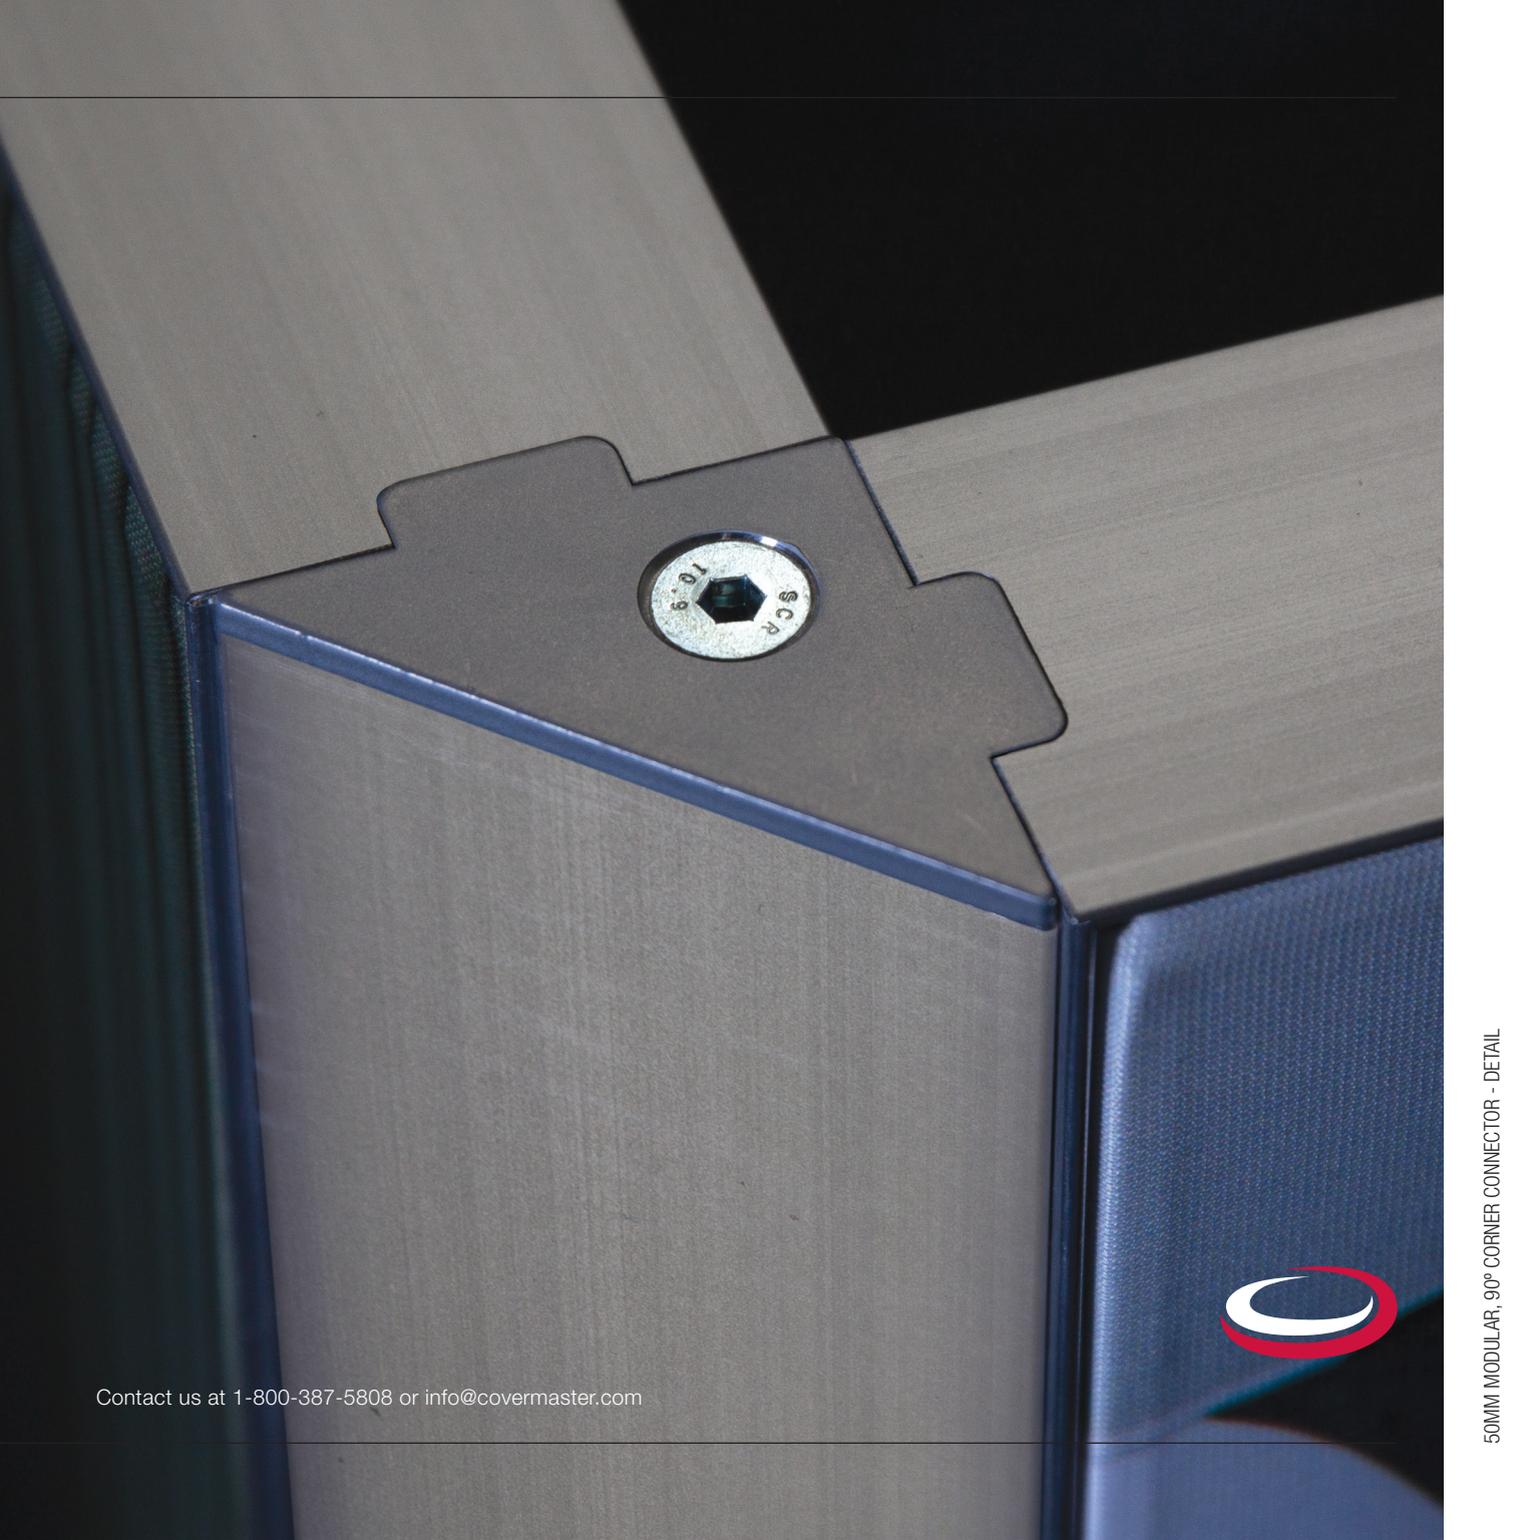

- Straight-Hidden
- Straight-Post
- 90 Degree Corner
- 3-Way
- 4-Way Connectors

Finishing plates are easily screwed to the ends of the connectors to close and finish the joints.

50MM MODULAR CONNECTORS

STRAIGHT HIDDEN CONNECTOR

Connect graphic walls with ease by simply inserting the Straight Hidden Connector strip between the segments.

This creates a flush connection and provides a near seamless appearance for tiling large images over multiple frames.

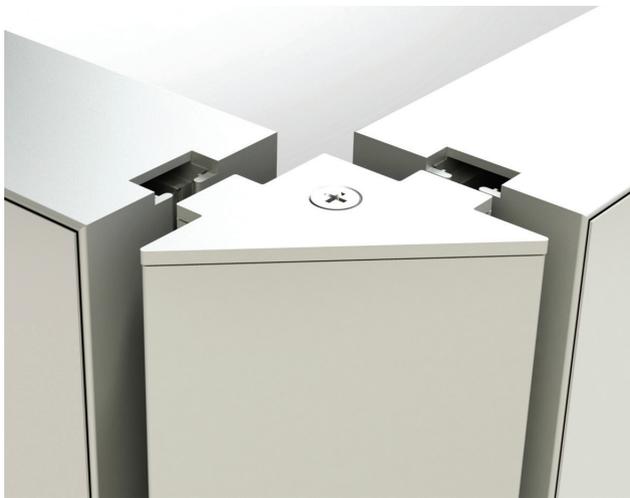

STRAIGHT 2" POST CONNECTOR

As with the Straight Hidden Connector, this assembly connects two graphic walls together in a straight line. The 2" space allows for a visual break between each graphic wall.

This ensures that you can position your prints in and around fixtures and other partitions without losing graphic visibility.

The **LOOK** Company[®]

90 DEGREE CORNER ANGLE CONNECTOR

The 90 Degree Angle Connector allows for two graphic walls to be joined to create a corner. This connector itself is finished flat, providing an elegant, polished look to the joined walls.

90 DEGREE QUARTER ROUND CONNECTOR

The 90 Degree Quarter Round connector has all the features of the 90 degree corner angle connector, but provides a rounded finish to match the elegance of the bullnose end post.

Contact us at 1-800-387-5808 or info@covermaster.com

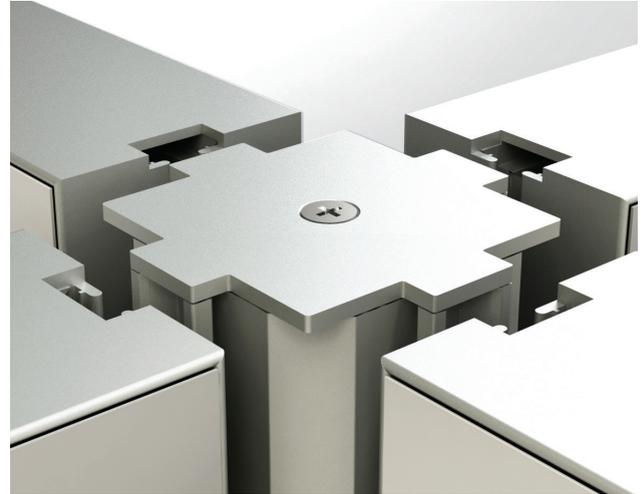

50MM MODULAR CONNECTORS

3-WAY CONNECTOR

As the name suggests, this Three-Wall Connector creates a “T” type partition connection, ideal for creating vignettes or altering customer flow

4-WAY CONNECTOR

The Four-Way Connector allows for the joining of walls in four directions – all 90 degrees from each other. This can be used to create a variety of graphic wall geometries, from stand alone four-way partitions to complex retail or office environments.

50MM MODULAR END POSTS

BULLNOSE END POST

The Bullnose End Post provides a smooth rounded end to the assembly. It is an effective end post solution for trade show or retail environments where you wish to create an enhanced sense of elegance and is an ideal companion to the Quarter Round 90 Degree connector.

SQUARE END POST

The Square End Post continues the look and finish of the LookWare™ Partition System. This 2" post cleanly finishes the end of the assembly and follows the same sizing and look of the other square components such as the 2" Straight and "T" Connectors.
